

# Clinician Seating - RPG

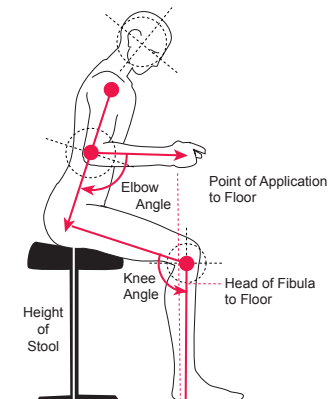

**Operator seating** is often the most neglected piece of dental technology – yet in many ways it's the **most important!**

Today, with the wide range of services offered, many practitioners find themselves in a fixed seated position for extended time periods — a situation that is extremely deleterious to the spine and to physical health in general.

Finding the right seat will contribute immeasurably to your long-term health.

Watch Dr. Ahearn's [short video](#) on posture, seating options, what makes a great choice in clinical seating.

## RGP 400-D LINE

The patented design of the **RGP 400** line helps protect your most important asset: **your health.**

Dr./Hyg. Stool (item S2A1)

Asst. Stool (item S2A2)

### Standard Features

- Patented split Backrest for lower lumbar support
- Contour Seat Cushion
- Built with standard cylinder height range (18.5" - 24.5" seat level)
- "Active Seating" responds to weight and position changes
- Rich Ultraleather® upholstery
- Single lever, multi-function Control
- Assistant Stool includes adjustable Foot-ring for added comfort and utility

Unique to the 400 series is its hydraulic mechanism which allows the stool's back and seat to 'float', following one's movement. This "Active Seating" is further enhanced by the adjustable heights of both the backrest and the stool itself.

Early in our research of the most ergonomically efficient dental methods, we realized that belly bars are not typically necessary. In fact, they often get in the way. With proper positioning of materials and supplies, assistants are able to maintain a sound ergonomic posture that provides better comfort and improved productivity. However, belly bars are available.

## COLOR CHOICES & CONFIGURATION

RGP stools are available in any of our EP standard color selections to match or compliment the 3-Series Patient Chair. Swatch samples and custom colors (upgrade) are available. Please call for details.

The Doctor/Hygienist stool is available with optional armrests (shown above).

## CROWN SEATING

For nearly 20 years **Crown Seating** has been an industry leader in the design and manufacturing of ergonomically correct Dental and Medical stools. Utilizing the **highest quality materials and craftsmanship**, Crown Seating manufactures a wide variety of styles, at **many different price levels**, for professionals across multiple industries.
