Assembly & Installation Guide

N1: Ergonomic Products 16” Inwall Comfort Station®
INTRODUCTION

In this manual you will find complete installation instructions for your new Ergonomic Products 16” Inwall Comfort Station®. There are five (5) major sections:

1. Receiving 16” Inwall Comfort Station®
2. Tools needed for installation
3. Preparation for installation
4. Installation of 16” Inwall Comfort Station®
5. Plumbing installation

SECTION 1 – RECEIVING YOUR 16” INWALL COMFORT STATION

Before starting to assemble your 16” Inwall Comfort Station®, carefully follow the instructions in the subsections below. Doing this will facilitate the actual installation process.

Shipping Configuration

Your products have been carefully packaged at the factory for safe shipment.

Inspect the shipping cartons immediately for evidence of in transit damage. If you see any indication of external damage, call us at the toll-free number listed above. This will simplify making a claim against the shipping company.

Unpacking

Open each shipping carton and carefully remove the contents. Remove all packaging material from the contents of the shipping cartons. Arrange the contents on a bench or table in preparation for the inspection described in the next section.

Inspection

After unpacking your 16” Inwall Comfort Station®, carefully check that the configuration/options for your product(s) are correct. If anything is damaged or missing, contact Products customer service at 1-866-ERGO-4-US.

We make every effort to ensure that shipments are complete. However, if anything is damaged or missing, please call us immediately and we will send the item(s) out to you promptly.
**Note:**
Depending on the shipping method, the mirror may or may not be attached. If the mirror is not attached, instructions are listed as the last step of installation.

**SECTION 2: TOOLS NEEDED FOR INSTALLATION**

<table>
<thead>
<tr>

<td></td>
</tr>
<tr>
<td>Four (4) #8 or #10x 2” Flathead Screws</td>
<td></td>
</tr>
</tbody>
</table>
SECTION 3 – PREPARATION FOR INSTALLATION

[Diagram showing measurements and components of the installation setup.]
Wall opening

The rough opening for the 16” Inwall Comfort Station® should be as shown in figure 1. Minimum depth of the cavity is 4” for the 16” Inwall Comfort Station®.

At this time, you should also verify all of the plumbing specification indicated in figure 1.
SECTION 4 – INSTALLATION OF 16” COMFORT STATION®

Installing the 16” Inwall Comfort Station

1. Insert 16” Inwall Comfort Station® in rough opening, making sure face frame fits tight against wall. (fig. 2)
   
   a) If there is a large gap visible, mark area and cut down wall surface to remove high spots on wall board. Small gaps can be filled with any paintable grade caulking.

2. After fit is satisfactory, drill two (2) countersunk screw holes on each side (fig. 3) while making sure unit is tight against wall.

3. While holding unit tight to wall, drive the four (4) screws in with the head just flush to the surface.
